 [STEVE YOMI](#) |  [YOMILEONEL](#) | Driving Licence Class B | [Portfolio](#) | Place and Date of Birth: Cameroon, 01 July 2003

Education

Clausthal University of Technology

October 2023 – September 2026

- Degree Programme: Computer Science, B.Sc.
- Semester: 6 (Bachelor's thesis in progress: "Beyond Accuracy: Measuring Intelligence in Programming by Example")
 - Goal: developed new evaluation metrics to measure how structurally close automatically generated code is to the correct solution, instead of only distinguishing between right and wrong
 - Applied and compared the approach on two existing open-source systems with completely different internal code representations (DeepCoder, DreamCoder), including a custom mapping developed between the two
 - Extended DeepCoder's search algorithm and built a complete, reproducible evaluation pipeline for systematic testing across both systems
- Coursework: Algorithms and Data Structures, Object-Oriented Programming, Linear Algebra, Computer Networks and Distributed Systems, Operating Systems, Digital Electronics, Design Patterns, Software Engineering (OOP), Databases (MySQL)

Work Experience

[Mariana Service GmbH](#)

December 2025 – present

Working Student Software Development

Project: B2C E-Commerce Platform

- Design and development of a legally compliant B2C online shop with Spring Boot and Next.js
- Implementation of e-commerce features such as product management, checkout systems and admin dashboards
- Integration of external services, including Stripe, AWS S3/Supabase Storage, Resend and RabbitMQ
- Deployment on a VPS including Docker, nginx and automated HTTPS configuration (Let's Encrypt)
- Set up a CI/CD pipeline with GitHub Actions for automated testing, builds and Docker-based deployment
- **Technologies:** Java, Spring Boot, REST-API, PostgreSQL, AWS S3, React/Next.js, TypeScript, Docker, nginx, Git

Project: IT Support Automation (n8n):

- Contributed to the design and implementation of an email automation with n8n to reduce the IT support workload
- Automated analysis and classification of incoming support requests as well as rule-based routing
- Integration of the OpenAI API (ChatGPT) for automated classification and analysis of incoming support requests
- **Technologies:** n8n, OpenAI API (ChatGPT), JavaScript, REST APIs, Webhooks

[Clausthal University of Technology – Institute of Computer Science](#)

Tutor for Logic and Verification

April 2026 – present

- Supported students in propositional logic, predicate logic and verification
- Assisted with exercises and exam preparation through structured explanations of formal proof techniques

Tutor for Computer Science III – Automata Theory, Formal Languages and Grammars

October 2025 – March 2026

- Taught complex topics such as automata theory, grammars and formal languages in tutorials and study groups
- Supported exam preparation with illustrative examples and structured explanations

Tutor for Computer Science Workshop – Application Systems (Python-Pygame)

October 2025 – March 2026

- Supported the implementation of applications in Python using Git and agile methods (Scrum, Taiga)
- Fostered teamwork and taught best practices in software engineering and project organisation

[Coding Giants GmbH](#)

Programming Tutor

March 2025 – March 2026

- Programming courses in Scratch (for young children), Python, Java and C#
- Development and application of classic algorithms as well as data structure fundamentals in Python
- Taught technical content in a playful and accessible way

Volunteer Work

[Clausthaler Studenten aus Kamerun e. V. / CSK](#)

April 2026 – present

Volunteer

- Supported new students with orientation in Clausthal as well as academic help in selected subjects
- Contributed to the development of the association's digital platform/website
- Co-organised cultural and social association activities to promote intercultural exchange

Projects

[CVforYou: Resume Generator \(Next.js, AI-powered\)](#)

- Developed a free, multilingual resume generator with 14 ATS-optimised templates and live preview in the editor
- AI-powered job matching (Google Gemini) with match score and improvement suggestions
- Server-side PDF export via Puppeteer/Chromium as well as a fully multilingual interface (German, English, French)
- Auth, data storage and photo storage via Supabase with row-level security
- **Technologies:** Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Google Gemini API, Puppeteer, Vercel

Spacio: Fullstack Booking Platform (Spring Boot + Next.js)

- Platform for booking meeting, event and training rooms with room search and filtering by city, name and description
- AI assistant (Google Gemini, function calling) answers customer questions about their own bookings and room availability using real live data
- Automatic organisation discount and role-based daily pricing logic
- JWT authentication with access/refresh tokens and password reset
- Admin dashboard with room management, photos and PDF invoice generation; dockerised deployment with CI/CD via GitHub Actions
- **Technologies:** Java, Spring Boot, Spring Security, Gemini API, Next.js, React, TypeScript, NextAuth.js, Tailwind CSS, PostgreSQL, Supabase, Docker, GitHub Actions

Checkers Game with Multiplayer Mode (Spring Boot + Swing)

- Designed the system using UML diagrams and Figma wireframes as the basis for implementing a client-server checkers game with Spring Boot (backend) and Swing (frontend)
- Developed a REST API for player, status and move management with real-time synchronisation via long polling
- Implemented the game logic including status detection and data persistence in the backend using OOP, algorithms and data structures
- Frontend based on the MVC pattern for real-time control and visualisation of the game
- **Technologies:** Java, Swing, Spring Boot, MySQL, UML, Figma, Git

Skills

Programming Languages: Java, Python, JavaScript/TypeScript, HTML, CSS, MySQL, C

Frameworks: Spring Boot, Next.js, Vite, React, Pygame

Tools: VS-Code, IntelliJ, PyCharm, Postman, Chrome DevTools, Docker, Excel, nginx, AWS S3

Other: Git, Figma, UML, Microsoft Office

Languages: French: Native | German: Fluent (negotiation level) | English: Good working knowledge
